

A combined successful of forces

# FUSION-X

Revolutionary filament easy to print and best in functionality

## WHAT IS IT?

A professional high quality 3d filament.

Excellent in bed adhesion, admirable at bridging and retraction. Keeping printed parts clean without any need of post-processing.

Features higher mechanical strength and impact resistance.

Engineering grade PET copolymer. Prints as nice as PLA, just stronger, more durable and with a shiner finish.

## FOR PROTOTYPES REQUIRING HIGH GEOMETRICAL AND DIMENSIONAL ACCURACY

## APPLICATIONS

- Mechanical parts
- Protective parts
- Snapfits

FUNCTIONALITY

RESISTANCE

CONFIDENCE

Fusion-X is a filament that combines the functionality of ABS with a strong resistance and durability, for fantastic results. It is extremely easy to print with excellent adhesion, no smell and no warping.

## TIPS AND TRICKS

EXTRUDER TEMP  
230°C-240°C

BED TEMP  
65°C-75°C

SPEED  
30-70 MM/S

## WHY FIBER FORCE

We are an Italian 3d printing filaments manufacturer. Our filaments are compatible with all the most important 3d printers. We speak the same language of professional actors, but wink to all the enthusiastic makers of 3d world.
